RESEARCH EXPERIENCE	University of California, Berkeley, Berkeley, CA <i>Graduate Research Assistant, Nuclear Waste Management Group</i> Developing analysis tools to study the nuclear fuel cycle and waste management by leveraging the data produced in the DOE Fuel Cycle Evaluation and Screening study. University of Connecticut, Storrs, CT <i>Undergraduate Research Assistant</i> Studied the reversibility of insulin protein dimerization to understand potential pathways for reversing the onset of Alzheimer's disease. Idaho National Laboratory, Idaho Falls, ID <i>SULI Research Intern, Energy Resource Recovery and Sustainability Department</i> Developed thermal models to understand corn stover biofuel feedstock degradation and the distribution of heat in cold crucible induction melters for application in nuclear waste disposal. UTC Power, South Windsor, CT <i>Cell Stack Research Intern</i> Studied subscale fuel cells to assess feasibility of replace the purge gas with a cheaper alternative. Performed thermal conductivity tests on fuel cell components to correct model correlations.	Aug 2014 – present Sep 2012 – May 2014 Jun – Aug 2013 Jun – Aug 2012
